FOUNDATION GROUTING

This Company has a wealth of knowledge in foundation grouting and provides services in this area. Management has had experience in managing from \$200,000 contracts to \$23,000,000 contracts in Australia, New Guinea and New Zealand.

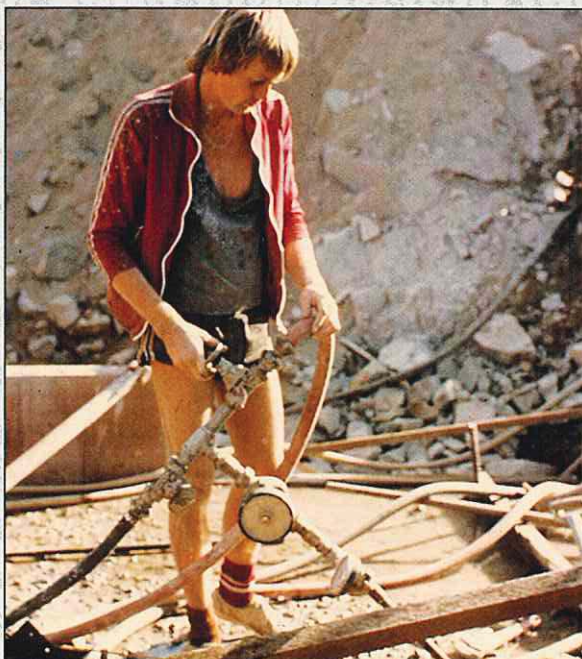

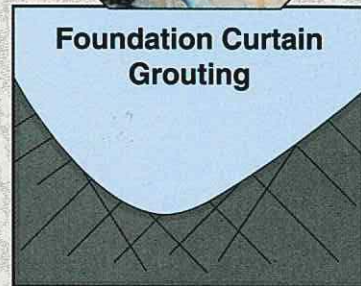

We offer contracting and consulting services for this work as required.

Photos of previous experiences show, Awoonga High Dam Gladstone. This was probably one of the most difficult projects grouted in Australia due to a need to accurately control uplift pressures and forces.

(Production drilling.)

(Water testing.)

(Surface leaks.)
